Harwood pellets are formulated from a unique blend of ingredients for maximum palatability, optimum digestibility, and performance. The unique combination of cooked and uncooked cereal grains, sugars, fats give the pellets a balanced supply of energy. Similarly, protein is supplied from a range of sources, providing degradable and bypass protein to meet requirement. This combined with a quality vitamin and mineral premix allows us to tailor pellets to a variety of livestock classes.

Please consult your nutritional advisor as to the recommended levels to feed your cattle and or sheep for your individual situation.
